

Energy Committee October, 14, 2008

A meeting was held in the district office tonight to discuss an RFP. Kirk Gostkowski, Ron Wayne, and Keith Rooney attended. We took a proposal from Johnson Controls and streamlined the document to reflect the district's needs. Board looked at a solution with yearly savings and quick pay backs. Heating & ventilation, lighting, computer management were the topics we discussed. Board of ed reviewed the energy spreadsheet and decided to move forward with an energy RFP. I then met with Richard Bartlett (Architect) on the following Monday in Gene Levenstein's office. Rich was given all of the district energy audits along with a sample energy RFP. He was instructed to break down every building with a cost savings & payback timeline. In November the board of ed will review this document and vote on an energy solution as a team. Once this is completed, we will go out to public bid.
