

Energy Committee November 18, 2008

A meeting was held in the district office tonight to review all energy updates.

- I met with Rich Locke Manager National Grid . We discussed a deal to put our Co Generation units back in service. He will be contacting Kirk next week with the details. We have to ensure the deal comes with a warrantee to financially protect our district. Proposal will save us 80,000 thousand dollars a year.
- I met with Ron Gulmi about a possible shared deal with National Grid & Town of Babylon on a natural gas bus depot at JFK. Board of Ed will review at a later date.
- Kirk's crews are installing motion sensors at the High School & Frost. I will be looking to aim at JQA & JFK next.
