

Energy Committee October, 09, 2007

Meeting was held tonight at the district office. Jim Cummings RF principal and Paul Catrone DP resident & LIPA employee were present. I updated them on the energy audit going on at our district. I will be moving time zone to 7pm every month due to the special needs committee.

1) Energy audit is almost complete (daylight savings time). Once audit is completed I will be meeting with the green team for a debrief. I will also be meeting with local politicians on October, 19, 2007 to come up with a game plan to change the way DP schools utilize energy. We together as a team will look at ways to conserve energy. Solar panels, geo thermal energy, wind mills & smart boilers will all be addressed. I will also look at ways to get federal, state grants to help the district pay for the conversion process. I would also like to be informed by the administration of any changes made in our buildings (I want to make sure we get the right equipment and rebates from LIPA).
