

Energy Building utilization

A meeting was held on Tuesday February 9th in the District office. Board Members, Administrators, and community members to discuss the utilization of our existing buildings. Here are the topics that were discussed.

- We discussed the possibility of merging Lincoln and May More together and renting Lincoln to Boces or a third party to save money.
- We discussed the possibility of merging Homer Ave and Washington in phase two downstream .
- We agreed that we will have a commercial Real Estate company evaluate all of our properties.
- We would like Community residents to join this team so we can here their concerns.
- We will be looking at personnel, sports utilization, and Community Center usage.
- Energy Proposal has been signed and the deal is in Albany waiting for approval. Once we get the OK from Albany , Deer Park Schools will be implementing our Energy plan to reduce costs up to 35 % a year. Plan includes new boilers, weather proofing, computer energy management systems, light sensors in every building, general lighting, and computer PLC's that control heating & cooling in every building that can be accessible through a laptop computer.
- Once Energy deal is approved we will make public announcement and put together a training video for our children to teach them what were doing and it's effect on the environment.
